DETAILED ACTION

1. This action is in reply to applicant's correspondence of 19 June 2006.
2. Claims 1-38 are pending for examination.
3. Claims 1-38 remain rejected.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-38 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Software per se is not patentable such that the software method (i.e., executable code or executable method software part of/associated with an object instantiated, loaded, remotely accessed, etc.) must be embodied on a computer readable media. Claim 1 is directed towards "An *apparatus* for ... the apparatus: a first *application capable of* ... one or more *proxy objects* ...", clearly an apparatus claim with software limitations. Claims 2-38 recite similar associations between apparatus, means plus function variations and software claim limitations in various combinations and independent and dependent forms. For the sake of applying art, the burden on the examiner would be unreasonable insofar as in, for example, the case of the proxy aspects of the claim limitations for the claims as filed, a distinction between a proxy in the form of software or hardware would clearly necessitate a determination of what classes are to be searched in order to resolve the ambiguities involved, which *may* result in restriction issues (i.e., software proxies associated with security/security mechanisms versus network art per se dealing with hardware proxies and associated embodied software).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The argument above for the 35 U.S.C. 101 rejection analogously applies in the case of the applicants claims insofar as a rejection under 35 U.S.C. 112 is concerned.
